
Nikita Petrov

Product Engineer | AI-assisted Product Development

grekf3.github.io/en | github.com/GrekF3 | Telegram @GrekF3

Based in Phuket, Thailand (UTC+7) | Available for new projects

PROFILE

Independent full-stack developer building digital products since 2022. Focused on new web products and MVPs, from architecture and implementation through testing and launch. Project experience spans digital commerce, payment and fulfilment workflows, AI-enabled content tools, real-time messaging and CRM integrations. Actively uses AI-assisted development. Seeking repeat product-build engagements with European agencies, product studios and founders.

CORE SKILLS

- **Backend & data:** Python, Django, Django REST Framework, FastAPI, PostgreSQL, SQL, Redis, Celery.
- **Frontend:** TypeScript, JavaScript, React, Next.js, HTML, CSS.
- **AI & integrations:** OpenAI API / LLM integrations, REST APIs, WebSocket, Stripe API, Telegram Bot API, CRM APIs, Google Sheets API, Playwright.
- **Delivery:** Git, Docker, Linux, Nginx, CI/CD, GitHub Actions, pytest.

SELECTED PROJECT EXPERIENCE

Beatprod | Music marketplace

Independent product · Since 2025 · beatprod.com

- Built a marketplace for music content, including payments, file delivery, PDF licence agreements, subscriptions, commissions and revenue sharing between collaborators.
- Automated BPM and musical key detection, AI-generated descriptions and tags, video creation and YouTube publishing.

Stack: Python, Django, PostgreSQL, Celery, Redis, Stripe API, Docker, GitHub Actions.

Itemix | Digital goods marketplace

ITEMIX TECH LTD · Since 2026 · itemix.co

- Built the product catalogue, order workflows, seller accounts and administration tools for a digital goods marketplace.
- Integrated suppliers and automated catalogue updates, payments and order tracking; built tools for order management, customer support and email operations.

Stack: Python, Django / DRF, Next.js, TypeScript, PostgreSQL, Redis, WebSocket, Docker.

Luvio | Dating platform & AI messaging

LUVIO CLUB LIMITED · Since 2025 · luvio.club

- Built registration, profiles, discovery, matching and real-time chat.
- Added AI conversation partners, automated conversation flows, notifications and moderation tools.

Stack: Python, Django / DRF, PostgreSQL, Redis, Celery, WebSocket, OpenAI API, Docker.

AUTOMATION & ADDITIONAL PRODUCTS

Gigobee | Travel eSIM storefront

gigobee.com

- Built the product end to end, including destination and data-plan browsing, purchase and setup interfaces, and a customer account area.

theOne News | Editorial workflow automation

- Built a platform that gathers material from websites, news feeds and social platforms, including browser-based collection.
- Automated deduplication, moderation, translation and AI rewriting. Prepared headlines, text, media and source links for editors to review before publication.

Stack: Python, FastAPI, PostgreSQL, SQLAlchemy, Playwright, OpenAI API, Docker.

CRM & operations automation

- Automated customer record updates, deduplication and owner assignment.
- Connected CRM data with operational spreadsheets while preserving managers' comments and existing records.

Stack: CRM APIs, Bitrix24, Google Sheets API, JavaScript, browser extensions.

Silent Wallet | Multi-chain wallet (beta)

Independent product · Since 2026 · swallet.site

- Built a non-custodial wallet for five blockchain networks, with account management, transfers, portfolio views and transaction history; private keys are stored on the user's device.
- Integrated swaps and cross-chain transfers and prepared web, desktop and mobile versions.
- Public repository includes Vitest tests and CI checks, with desktop releases and Android beta build artifacts.

Stack: TypeScript, React, Next.js, Tauri, Capacitor, Web3 APIs, Vitest.

EARLIER EXPERIENCE

- **Stroy-Titan | Web developer | 2023:** Django / DRF backend for concrete ordering, PostgreSQL and automated Telegram notifications to sales managers.
- **ezservers | Web developer | May-July 2022:** Game server catalogue, subscriptions, profiles, chat and payment integration. Django / DRF, PostgreSQL, Nginx.

EDUCATION

Academy of Marketing and Social Information Technologies, Krasnodar · 2022. Vocational qualification in information systems development and design. QA Engineer course, SimbirSoft · 2022.
